On 1 December 2020, Mysseira Arabs multiplied deadly attacks in the city of Boromata. This locality of 10,000 inhabitants, located in the Vakaga prefecture, has been looted and burnt causing 5 deaths and 14 injuries. Material losses are also significant, with 1,325 homes and 84 shops destroyed.

After the securing of the city and its surroundings by the Central African Armed Forces (FACA) and UNMISCA, an inter-agency mission composed of ACTED, IMC (International Medical Corps), WFP (World Food Programme), ICRC (International Committee of the Red Cross) and OCHA (Office for the Coordination of Humanitarian Affairs) conducted a humanitarian needs assessment on December 10, 2020. Multiple needs were identified in the sectors of Health, Water, Hygiene and Sanitation (WASH), Shelter, Non-Food Items (NFI), Protection and Food Security.

In order to respond to the priority needs of the affected populations, humanitarian actors based in Birao (TGH, ACTED, IMC, ICRC) organized a joint mission from 21 to 28 January 2021. In this framework, and with the financial support of the AFD, Triangle Génération Humanitaire (TGH) participated in the response in WASH, through the rehabilitation of 9 manual boreholes, the installation of 8 hand washing devices and the reinforcement of the capacities of 4 artisans for the water pumps maintenance. 60,000 chlorine tablets for water treatment were also distributed. 3214 people have been sensitized on the use of these chlorine tablets through demonstration sessions and 4222 have been sensitized on the key steps of hand washing. Finally, 8 traditional wells were chlorinated in the Boromata neighborhoods.
