News Ukraine April 2022

TGH has relocated to Lviv in Ukraine with a reinforced team

The following interventions are currently ongoing:

- Psychological support, in partnership with the Ukrainian association of psychologists Avalyst: consultations via a hotline, as well as face-to-face consultations on sites hosting displaced persons.
- Legal support to guide and help displaced persons exercise the rights accorded to them by the Ukrainian administration and to advise them according to their specific situation (relocation within Ukraine and/or immigration). A hotline has also been set up to access this support, which is advertised on sites hosting displaced persons (where drop-in sessions are also available) and on social media.
- Cash assistance for people who are vulnerable, displaced or living in conflict-affected areas.
- Donations in-kind to help keep institutions (schools, orphanages etc.) and sites hosting displaced persons operating.
- Support for initiatives undertaken by civil society organisations.

These activities are being implemented in the east of the country (Donetsk and Luhansk oblasts) where TGH has been working since 2015 and had the most capacity. This is also where the humanitarian needs are currently the most acute. Given the changing situation and the large numbers of displaced persons, we are now also working in oblasts in the west of the country.

To date, TGH’s actions have received financial support from the Région Auvergne Rhône-Alpes, Fondation de France, Secours Catholique and UNICEF.
