

20 24 | ACTIVITY REPORT

A MESSAGE FROM THE PRESIDENT

2024 is a special year in the history of Triangle Génération Humanitaire in several aspects. First of all, it marks the 30th anniversary of the association, celebrating 30 years of commitment and activism led by its founders, who are supported by loyal staff, a team committed to developing and perpetuating an association we like to describe as human-sized, closely connected to local actors and attentive to the needs of the most vulnerable.

2024 is a significant year, marked by the death of one of its founders, Patrick Verbruggen. An atypical, committed and militant personality, member of the first generation of humanitarians and inseparable from the history of TGH, he embodied the association's identity and served as the guardian of its methods of actions. This is an opportunity for me to pay tribute to him.

2024 is further the year of transition, marked by a change of governance. I extend my gratitude to Véronique for her years of presidency, rich in debate and reflection. This year also sees the retirement of Christian Lombard, co-founder of TGH and Patrick's essential partner in ensuring the smooth running and management of TGH.

This transition has required strong mobilisation from governance in order to ensure the recruitment of the new Director and thus demonstrate the continuity of our association, beyond the involvement of its founders.

CROSS-DISCIPLINARY EXPERTISE FOR GREATER IMPACT

Putting climate change at the heart of our projects

In 2024, TGH actively participated in several focus groups of the Humanitarian Environmental Network (REH) focusing on waste, sustainable procurement and environmental assessment. At the end of 2024, TGH also signed the REH's Statement of Commitment on Climate by Humanitarian Organisations, with a target of reducing its carbon footprint by 50% by 2030. In light of this, a webinar was organised for field teams to present the tools developed by TGH, in support of the adaptation of its projects and intervention methods against the effects of climate change.

Our cross-cutting expertise in the service of project quality

In 2024, the Sudanese conflict, which started in April 2023, had significant regional repercussions. The crisis spread from Sudan to Chad, reaching the north-east of the Central African Republic (Vakaga). TGH had to adapt its interventions according to local contexts and the needs of the displaced populations, refugees or hosts. TGH's three areas of expertise were mobilised to lay the foundation for a regional strategy to respond to the needs of the most vulnerable.

Water, Hygiene and Sanitation

Access to drinking water remains a priority. In Sudan, emergency water trucking services were deployed, complemented by the reconstruction or rehabilitation of boreholes and pumping systems. Similar infrastructure was built in the Korsi refugee camp in Vakaga (CAR). Sanitation services were also strengthened in Sudan, Chad and in the Korsi camp : including the construction and desludging of latrines, participatory cleaning campaigns, namely in health facilities in Sudan. To prevent epidemics, hygiene awareness actions are carried out, accompanied by the distribution of dedicated kits. In Chad, for example, water storage equipment was distributed to vulnerable families.

Protection and Education

TGH continued to carry out its child protection activities in Vakaga and Darfur. Three Child Friendly Spaces (CFS) were opened in Birao (CAR), completed by a mobile team in rural areas. In Darfur, twelve CFS were installed. Psychosocial support and parental awareness activities were organised to reduce the stress among children and their caregivers, and strengthen their protection. The identification and referral of children at risk (handicap, abuse, family separation, etc.) to appropriate services were maintained. TGH also supported community and local structures to raise awareness of children's rights and to ensure referral to specialised services.

Food security and livelihoods

In Sudan, Chad and the Central African Republic, the crisis is undermining livelihoods: massive displacement, destruction, and agricultural shortages. TGH provided emergency assistance via money transfers to the most vulnerable households, without disrupting the balance of local markets. This assistance was supplemented, as soon as possible, by a support for agricultural development: donations of seeds and equipment, training, support for pastoralism and transhumance notably in Vakaga. Given the combined effect of the conflict and climate change, this support is essential to revive local production. ►

OUR PROGRAMMES

Period of activity: 2000 to the present

For the year 2024: 3 projects

Number of international employees: 1

Number of national employees: 154

Number of beneficiaries: 173,600

List of partner funding bodies: United Nations High Commissioner for Refugees (UNHCR) · World Food Programme (WFP) · UNICEF

List of operational partners: Algerian Red Crescent · Sahrawi Red crescent · Sahrawi authorities: Ministries of Education, Public works, Transport, Social Affairs and Women's Empowerment, Health, Water and Environment, Cooperation, Security, economic development and Construction

Drawing on its experience in Sahrawi refugee camps since 2000, TGH continued in 2024 its multi-sectoral support, which included emergency interventions aiming to improve the living conditions of Sahrawi refugees, and the implementation of sustainable solutions that strengthen local resilience capacities. TGH worked in the fields of physical and mental health, hygiene, food security and livelihoods, education, support for people with special needs, and humanitarian logistics.

As part of its inclusion programme, for instance, the TGH team has developed and delivered a three-day training course in April to the 36 educators working in the Special Education Centres of the camps. The objective of this initiative was to train and equip the Special Education Centres' professionals to best meet the socio-educational needs of students attending the centres. Thus, staff were trained in the diagnosis and care of children with special needs, allowing the creation of safe and appropriate educational environments. This training course was organised in

cooperation with the Ministries of Social Affairs and Women's Empowerment, Education and Health. The final day of training was dedicated to a practical workshop on guided care for children with Autism Spectrum Disorders (ASD) who have language difficulties.

Another example of TGH's intervention in the medical field was the support of HIV screenings and awareness. Moreover, an awareness raising event was organised as part of World AIDS Day. These activities are fundamental to improve patient care, as well as the rapid and effective detection of infectious diseases within the Sahrawi community. ▶

Period of activity: 2007 to present

For the year 2024: 5 projects

Number of international employees: 16

Number of national employees: 88

Number of beneficiaries: 151,374

List of partner funding bodies: Crisis and Support Centre of the Ministry for Europe and Foreign Affairs (CDCS) · Agence Française de Développement (AFD) · UNICEF · Directorate-General for International Partnerships (INTPA) · European Commission Directorate-General for European Civil Protection and Humanitarian Aid Operations (ECHO)

List of operational partners: Première Urgence Internationale (PUI) · UNICEF · Mercy Corps · Central-African Agency for Agricultural Development (ACDA) · National Agency for the Development of Livestock Production (ANDE) · National Federation of Central African Livestock Farmers · Inspection Académique du Nord Est · Fédération nationale des associations de parents de Centrafrique · National Institute for Educational Research and Promotion (INRAP) · National Water and Sanitation Agency (ANEA) · Foundation Kamelélou · Association Olivier Homme de Galilé pour le développement

Present in the Central African Republic (CAR) since 2007, TGH carries out today emergency, post-emergency and development projects in the Lobaye, Bamingui-Bangoran and Vakaga prefectures, adapting to the needs and evolution of contexts whose level of security varies daily. Despite the signing of the peace agreement of Khartoum, Sudan, in 2019, CAR faces an ongoing humanitarian crisis. In 2024, the security situation remained worrying, on one hand, due to the presence of armed groups and, on the other hand, as a result of the humanitarian crises in neighbouring countries, such as Chad and Sudan, where TGH also intervened.

TGH has worked in Bangui since 2011 to strengthen and sustain holistic care for street children and imprisoned minors, as well as to improve the socio-economic opportunities of young people, through support for vocational training facilities. In Vakaga, TGH intervened using an integrated multisectoral

approach, in the fields of Water, Sanitation and Hygiene (WASH), education, protection, food security and livelihoods. TGH aims to respond to emergency situations, while supporting state and para-state institutions, in order to contribute to the local development of the area.

Through five projects carried out in Vakaga, TGH concentrated its efforts in view of improving sanitation and water access conditions, namely in Sudanese refugee camps and for host populations. It also worked to strengthen the local educational system and child protection through a psychosocial approach. Finally, TGH helped populations affected by food insecurity, in a region where transhumance is customary. ►

List of operational partners: International Committee for Relief and Development

2024 marked the launch of a new mission in Chad for TGH, in close collaboration with TGH's Sudan mission working across the border in the Darfur region.

After completing its registration in the country in 2023, TGH carried out projects in the province of Ouaddai and needs assessments in the province of Wadi Fira. Located in eastern Chad, these two provinces face significant humanitarian needs due to the low availability of resources

and infrastructure, inter-ethnic conflict dynamics and an influx of refugees from neighbouring Sudan.

In 2024, TGH distributed non-food items, seeds and agricultural tools in formal and informal refugee camps. Moreover, TGH rehabilitated and built toilets. It also carried out hygiene and sanitation awareness-raising activities in order to prevent the spread of epidemics recorded in the region (cholera, hepatitis E, etc.).

In addition, as part of TGH's general strategy to 2027, the latter established and developed in 2024 new partnerships and alliances to launch in 2025 larger-scale interventions in areas with limited humanitarian coverage, where needs are significant.

Finally, TGH benefited from the skills-based sponsorship of Argon & Co to refine its positioning in terms of an anticipatory action. ▼

TGH's Ethiopia mission was first launched in 2024. Following a comprehensive needs assessment of the country's residents and authorities, TGH has chosen to implement interventions to help the most vulnerable populations in the Tigray and Afar regions.

TGH's actions aimed to strengthen the resilience of the population affected by the conflict between 2020 and 2022, in the areas of food security, particularly with regard to climate change.

During the last couple of years, Ethiopia experienced more frequent and longer-lasting droughts than usual. The last dry episode (2022 - 2023) is considered the worst drought the country has experienced in 40 years, triggered by six consecutive failed rainy seasons. The country's food insecurity is largely caused by drought. Although recent rainfall has provided relief to previously affected areas (water supply and pastures), the consequences will be long-lasting. In Afar, drought has disrupted the production of more than 250,000 farmers, while 1,7 million livestock have been malnourished or even killed, causing a drastic de-

cline in the nutritional levels of the local population. The unfavorable climatic conditions for agriculture, coupled with numerous displacement related to the armed conflict affecting the country, have increased the need for humanitarian assistance in the country.

TGH operated in Ethiopia as part of a consortium with Première Urgence Internationale (PUI) and Acted. On the ground, TGH and Mercy Corps have partnered to ensure that vulnerable and food-insecure families from Erebti, whose children suffer from severe acute malnutrition (SAM), as well as households whose pregnant and breastfeeding women suffer from moderate acute malnutrition (MAM PLW), have their food needs met. In order to do so, the provision of an unconditional financial assistance has been established, thereby improving nutritional results in targeted areas. ▼

Period of activity: 1996, 2004, 2013 to present

For the year 2024: 5 projects

Number of international employees: 0

Number of national employee: 36

Number of beneficiaries: 12,244

List of partner funding bodies: Agence Française de Développement (AFD) · European Commission Directorate-General for European Civil Protection and Humanitarian Aid Operations (ECHO) · German International Development Cooperation Agency (GIZ) · Crisis and Support Centre of the Ministry for Europe and Foreign Affairs (CDCS)

List of operational partners: Mercy corps · Public Aid Organisation · Terre des Hommes Italy · Kurdistan Save the Children · Action Against Hunger · Secours Islamique France · 15 national private partners · 16 national public partners

TGH has been working in Iraq since 2013, through activities in food security and livelihoods (SAME), as well as education and protection. During 2024, TGH continued to carry out its activities in the Ninewa and Salah ad-Din provinces, and expanded its interventions to the southern provinces of Al-Muthanna and Thi Qar.

Thanks to the PERMA II project, TGH promoted in 2024 access to agricultural land for farmers, including those who returned to their villages after the fall of the Islamic State. The resumption of viable agricultural activities has been made possible through training, the adoption of innovative practices such as the solarisation of irrigation systems or the use of protein-rich cacti and algae as animal feed, as well as partnerships with the private sector and universities. This project had, on one hand, a result in terms of economic recovery and adaptation to climate change and, on the other hand, in terms of social cohesion.

Moreover, TGH's activities in Iraq are part of a localised approach, which is at the heart of TGH's general strategy to 2027. This translates into the implementation of projects with or via local partners. Thus, in 2024, TGH supported the NGO Kurdistan Save the Children (KSC) in the implementation of a project for the protection and prevention of extremism among youth in the region of Kirkuk. The project's activities were fully implemented by the KSC, with the support of TGH, through its expertise in protection and youth work, as well as the Directorates of Youth and Sport.

This localisation approach was also translated through the complete nationalisation of TGH's team on the ground, with all positions now held by national staff. ▼

Building on its experience in Myanmar, namely in the states of Chin, Rakhine and Magway, TGH deepened its engagement in 2024 by developing new activities in the State of Kayin. Thus, TGH implemented a Water, Sanitation and Hygiene (WASH) project to meet the needs of the vulnerable population present in hard-to-reach areas. Moreover, TGH carried out rehabilitation and maintenance activities for water supply infrastructure and latrines, while organising community-based solid waste management and clean-up environmental campaigns.

As part of its activities in Myanmar, TGH highlighted the crucial role of its local partners. Since 2021, access has remained difficult for the staff of international organisations, due to the widespread conflict and administrative restrictions imposed by the military junta. Local partners, with detailed knowledge of local contexts, allow a more adapted response to the needs of vulnerable populations. Therefore, TGH strived to strengthen the capacity and resilience of its partners, believing that they are best able to understand and respond to

Restoration of a water retention basin, 2024. © TGH

protracted crises. In light of this, TGH pursued its activities to strengthen the operational and organisational capacities of five Burmese civil society organisations (CSOs). This project aimed in particular to network these CSOs, to improve their coordination and allow them, in the long term, to better respond to their needs.

Thus, TGH's strategy in Myanmar is based on an approach combining rehabilitation and development, strengthening the capacities of local partners, while remaining mobilised and flexible in the event of an emergency related to a natural or climatic disaster. ▴

TGH continued in 2024 its development activities in Nepal in the districts of Sindhupalchok, Kavrepalanchok and Ramechhap. The organisation implemented agricultural activities that balanced resilience to climate change and economic recovery, while the Nepalese economy suffered from its dependence on agriculture and the persistent weakness of local economic opportunities. In partnership with FRDev, TGH promoted agroecology, the reduction of the use of plastic and chemical input, as well as the risk associated with their use.

Moreover, rehabilitation activities were implemented in Jajarkot. In response to the 2023 earthquake, TGH rebuilt earthquake-resistant houses and community infrastructures to improve people's resilience to natural disasters.

In addition to its rehabilitation and development programmes, TGH maintained since 2015 a flexible response capacity in order to offer emergency aid in case of climatic or natural catastrophes. In July 2024, TGH led an emergency intervention following devastating floods in the district of Sindhupalchok. Moreover, the organisation implemented emergency interventions after severe fires in the Madesh region worsened sanitary conditions and water scarcity.

Thus, adapting to climate change, mitigating its consequences, and transitioning to organic farming are the major challenges for Nepal in the years to come. In 2025, TGH plans to continue its activities around agroecology and resilience to natural catastrophes by continuing to work closely with its local partners. ▶

TGH launched its first mission in the Democratic People's Republic of Korea (DPRK) in 2000, following a call for international aid from the country's government in 1997. Since then, TGH has intervened in the areas of food security, through the development of agricultural and aquaculture activities, as well as in the protection of the most vulnerable fringes of the population, namely children under the age of six and elderly people. However, the closing down of the country in February 2020, as a result of the Covid-19 pandemic, heavily affected TGH's programmes. The departure of expatriates, following the closure of the country's borders, led to a temporary suspension of all TGH projects requiring their presence on the ground. Nevertheless, and in the perspective of possibly reopening the country's borders, TGH maintained a skeleton national team on the ground in order to have a rough idea of the internal situation. Furthermore, the organisation regularly scheduled coordination meetings with all concerned

Recreational activities for elderly and isolated people at the Sariwon Senior Citizens Centre (SCC), 2019. © TGH

humanitarian actors in order, on one hand, to be prepared in case of an eventual reopening of the borders in 2025 and, on the other hand, to coordinate the reassessments of needs that will be necessary when the time comes. ▼

Since 2023, TGH's intervention in Pakistan has been based on rehabilitation and development projects, while remaining flexible in order to provide emergency assistance in the event of natural or climatic catastrophes. Indeed, Pakistan faces significant humanitarian emergency and development challenges, exacerbated by poverty, inequalities, as well as a persistent limited access to basic services, particularly in rural areas and among marginalised communities. Moreover, the country is highly vulnerable to natural catastrophes, such as floods and droughts, which damage basic infrastructure and affect livelihoods.

lity inputs and technology, a lack of knowledge on climate-resilient agricultural practices, insufficient market reach, as well as a limited access to funding to transform their practices. Therefore, TGH's objective is to support agricultural cooperatives managed by women and youth in order to promote sustainable, inclusive and climate-resilient livelihoods. The project also encouraged South-South cooperation on agriculture between Nepal and Pakistan. In 2025, TGH aims to deepen its activities and its presence in Pakistan in order to meet the needs of the populations, both in the areas of agriculture and in emergency response to climatic and natural catastrophes. ▼

In 2024, TGH was the first international NGO funded by the AFD in Pakistan, initiating support to civil society organisations. TGH then strengthened its intervention in Pakistan by focusing on women and youth working in agriculture in Gilgit-Baltistan, in partnership with ASF and NACCFL. While the agricultural sector accounts for 23% of Pakistan's GDP, they are faced with a set of constraints that reduces their economic potential. They have limited access to qua-

In 2024, Sudan's humanitarian crisis was the worst of the year. In this context, TGH's mission in Sudan represented one of the organisation's main emergency responses, both in terms of mobilised resources and people assisted.

In different areas of the country, TGH established a multisectoral response to humanitarian needs, in collaboration with numerous partners. This multi-actor approach has made it possible to cover a wide range of needs, combining food security, access to water, hygiene and sanitation, as well as protection. This resulted in the installation or rehabilitation of emergency water supply points and latrines, the identification and support of children who are extremely vulnerable or have been rendered vulnerable due to the conflict, and the socio-economic support for displaced households.

Moreover, in consortium with several partners in Darfur, TGH launched the Emergency Response Mechanism (ERM). This initiative was implemented to ensure a rapid and effective response to sudden shocks

or massive population displacement in a region facing famine and insecurity due to the ongoing conflict.

Concurrently, TGH worked to strengthen the resilience of local communities, including : the provision for longer-term reconstruction means and livelihoods, training, the establishment of community groups for the management of water infrastructure, the referral of children, the sharing or rotation of agricultural production tools.

Moreover, TGH supported response initiatives set up by local civil society, notably to access the areas of the cities most affected by the conflict where humanitarian access was not guaranteed. This support served a dual purpose: to support and encourage grassroots initiatives, and to meet the needs of the largest number.

Thus, TGH expanded its network of local partners in Sudan to ensure a more adapted response to the context and specific needs of communities and individuals affected by the crisis. ▼

List of operational partners: Syrian Arab Red Crescent (SARC)

In 2024, TGH continued its interventions in Syria in the governorates of Hama, Daraa, Idlib, Aleppo and Rural Damascus via an integrated programme that can be adapted to changing circumstances. This flexibility has allowed interventions ranging from the rehabilitation of schools and water infrastructure to non-formal education, psychosocial support, hygiene promotion, teacher training, and awareness-raising among parents of children who dropped out of school.

For the first time, TGH launched rapid resilience and livelihoods activities in Idlib and Rural Damascus. This pilot initiative had two components: the training in life skills, entrepreneurship and employability

for young adults without a diploma, and the multi-purpose cash transfers to support families of children who dropped out of school or were at risk of dropping out.

In Aleppo and its rural surroundings, heavily affected by the February 2023 earthquake, TGH continued its activities with the rehabilitation of a sewerage network and several schools. In the governorates of Daraa and Rural Damascus, an integrated response was implemented to address the education and child protection needs of vulnerable communities.

During this year, TGH decided to include its actions in a localisation process, notably through the nationalisation of posts within the mission.

2024 also marked a major change in context with the fall of Bashar Al Assad's regime at the end of the year. TGH is committed to continuing its work and supporting the Syrian population. As an actor in emergency, rehabilitation and development, TGH is ready to adjust its programmes according to changing needs and context. ▼

TGH has been working in Ukraine since 2015, namely following the conflict arising from the annexation of Crimea by the Russian Federation and the self-proclamation of the separatist People's Republic of Donetsk and Luhansk. Since the Russian invasion of 2023, population displacement has continued unabated. Emergency needs continued to grow, both on the front line and in the east of the country, as well as in the areas of displacement, which make up almost the entire country. In this context, TGH has adopted a multisectoral approach in order to help populations affected by this conflict, by promoting protection and the response to essential needs. Moreover, TGH has expanded its scope of intervention to include the Water, Hygiene and Sanitation (WASH) sectors, the distribution of non-food items, as well as the rehabilitation of infrastructures damaged by air attacks and war-impacted homes. These initiatives were carried out through three projects, one of which was in collaboration with French NGOs that are members of the Dorijka consortium.

Working from its base in Dnipro, this wide-ranging approach has enabled TGH to set up emergency protection and shelters in the eastern region of the country, including in the oblasts of Kharkiv, Donetsk and Zaporizhzhia, where the number of people in need was particularly high. The mission in Ukraine represented TGH's largest workforce in 2024. However, affected by the reduction in public funds allocated to humanitarian aid, TGH has chosen to primarily invest in the combat zone by moving its operational base from Lviv to Kyiv. On the front line, the wintering actions carried out by TGH have enabled the populations to meet their needs during periods of extreme cold.

In Ukraine, TGH highlights the need to better localise aid through strategic partnerships with local NGOs. ►

List of operational partners: Communities in targeted neighborhoods · Local Water and Sanitation Corporation in Aden Governorate (LWSCA) · Première Urgence Internationale

Since 2020, TGH has been deploying, in the governorate of Aden, in southern Yemen, emergency actions to rapidly improve access to Water, Hygiene and Sanitation (WASH) in certain neighborhoods of the city of Aden. One of the project's components is to directly intervene in schools to guarantee decent schooling conditions. This WASH intervention in schools has enabled TGH to identify another need: that of the fight against malnutrition among children in school. Indeed, most children do not eat lunch at school for lack of financial means. Some just consume processed products, which are not very beneficial for their health, such as chocolate, biscuits, etc.

As a result, TGH started in 2024 a school canteen project in 12 schools in the governorate. In each school, a room was identified in coordination with the school management. All missing and necessary equipment has been provided for the preparation of meals. Some schools have been equipped with solar-powered electric systems to maintain the cold chain even during power cuts, frequent in Aden. In addition, 30 employees from different canteens have been trained by TGH's nutritionist on

Nutritional support for children in 12 school canteens in Aden, 2024. © TGH

food security, hygiene, nutritious cooking, as well as the importance of nutrition for children. 4 schools were selected as part of a pilot project for the preparation and distribution of meals on a daily basis. Since 2024, this project has enabled 4,610 children to receive a hot and balanced meal on a daily basis. ►

2024 – THE 30TH ANNIVERSARY OF TRIANGLE GÉNÉRATION HUMANITAIRE

On May 13, 1994, the statutes of Triangle Génération Humanitaire were deposited at the Rhone County Hall by its founders. Thirty years later, TGH has remained loyal to its original mission: providing unconditional humanitarian assistance to affected populations, whether it is in emergency, rehabilitation or development contexts. These 30 years of actions in favor of the most vulnerable were celebrated from the beginning of the year, starting in January with the publication of TGH's Manifesto, a strong statement affirming the values, associative mandate, and humanitarian commitment of the NGO.

Rooted in Lyon since its foundation, TGH took advantage of its 30-year anniversary to fully invest itself in the local associative life, with the aim of raising public awareness specially regarding some forgotten crises.

The city of Lyon played an essential role in enabling our NGO to widely address the local population. **In April**, the walls of the **9th City Hall** were adorned with a photo exhibition entitled *"Women in war, on the paths of those who remain"*, tracing the journey of 30 women during the war in Ukraine. **Then, in November**, as part of the 2024 Solidarity festival, the municipality supported the organisation of an unprecedented conference on the subject: *"Displaced people, refugees and climate: humanitarian issues"*.

In addition to these exceptional activities, the **Humanitarian Cafés** had brought together citizens and especially students around the crises in Sudan and Yemen. TGH continued its interventions in training institutions such as Bioforce, École 3A, University Lyon 3, Université Grenoble Alpes, Science Po Grenoble, ISTOM and ISARA.

Patrick Verbruggen and Christian Lombard, founders and co-directors of TGH, had anticipated that 2024 would be an important tran-

sition year, symbolising their handover after three decades of commitment.

In March, 2024, it was with deep sorrow that TGH's teams, members and relatives paid tribute to Patrick, who passed away following a long illness. A passionate and committed man in the field, he mobilised support around the NGO's associative project, always ensuring that beneficiaries and field action were at the heart of TGH's mission.

In December, TGH celebrated Christian's retirement. Driven by a deep commitment and strong convictions, he worked tirelessly to pass on the NGO's values. He initiated numerous public awareness campaigns and wanted every member of the association to be fully involved.

2024 was a year of transition, of transmission but also of renewal. It was a year of change, driven by a 30-year legacy of humanitarian actions serving people in greatest need. A new chapter has opened for TGH with the arrival of the new General Director, Stanislas Bonnet, and all teams are mobilised to write the next pages in TGH's history. ►

TESTIMONIALS

Anastasiia Kutserubova

*Programmes Manager
in Ukraine*

« My journey with TGH started in February 2023, after a year of full-scale invasion of Ukraine. Starting with assessments of the emergency contexts, I was able to form a strong understanding of the humanitarian context. This was helpful when I became part of the TGH's Basic Needs team. During that period, we were able to assist Internally Displaced People with cash, support people affected by shelling with insulation repairs, provide collective sites with essential NFI, and many, many more. Working with TGH gave me an opportunity to connect with many outstanding people from the local communities or those who were displaced due to the war. Each of them brought their own unique story and later shared how cooperation with TGH changed their lives. I was able to expand the network with local authorities, cluster representatives, and people who work in the humanitarian field. Later, I became a programmes manager and was able to bring all those stories, connections, and contextual background to the design and implementation of the projects. Even though each day brings new context, I believe that a strong team, empathy, and proficiency are my biggest allies on the way to supporting those in need. »

Billy Jackson

MEAL Officer in Myanmar

« I began my journey with TGH in 2017 as a Monitoring Officer for a Food Security & Livelihood project in Matupi, where I worked for four years. After a short break, I rejoined TGH in 2023 as a Partnership and Coordination Officer, and since July 2024, I've been serving as a MEAL Officer under the AFD's capacity building project and CDCS project in the Yangon Office, Myanmar. Over the years, I've seen how TGH values dedication and adaptability, and I'm proud to have grown alongside the organisation. My experiences

here have strengthened both my technical and coordination skills, and I feel honored to contribute to TGH's mission in Myanmar. Being part of TGH for seven years has been a truly meaningful chapter in my career. I'm grateful for the opportunities I've had, and look forward to continuing to contribute to TGH's mission, particularly as we work on strengthening our monitoring systems. I am excited to continue this journey with TGH with the same motivation and aspirations. »

Dia Salah

*Partnership and Capacity
Building Manager in Sudan*

« I have been working with TGH for six years. After the war started in Sudan, TGH gave me the opportunity to take up my current position, which was new for both the organisation and myself. When I started, TGH was already working with six national partners and wanted to develop its local partnerships and localisation further still. Now, I am developing this strategy in the field. I meet with partners to develop capacity-building plans for them and follow up with them. I build and maintain strong, strategic relationships with TGH. By engaging with local stakeholders and gaining a deep understanding of the Sudanese civil society context, I have learned to identify potential partners beyond the usual actors. I believe in fostering partnerships based on trust, transparency and shared objectives. I enjoy being confronted with new tasks in my job, which allow me to solve problems creatively, using verbal and non-verbal communication and active listening. I am proud of this interesting position because each new partnership brings extra knowledge and expertise for the mission. »

Nasr Saeed

Logistics Assistant in Yemen

« My journey with TGH began in the second half of 2021. I had never imagined that I would work in the logistics field, but that's life – not every-

thing can be planned. When I joined TGH, I naturally started from scratch. Thanks to the cooperation of everyone in the field and at HQ, I came to understand the requirements of the job, expanded my knowledge and the duties assigned to me, and witnessed the positive impact of my work, reflected in the faces of the beneficiaries. This greatly influenced me and gave me an invaluable morale boost to do more to serve people in need. Finally, I seize this opportunity to thank TGH for its tangible projects aimed at rehabilitating the WASH infrastructure of Aden. »

Rana Qhedr

MEAL Manager in Syria

« I started my journey with TGH in 2024 as a MEAL Officer. Thanks to the support and trust from the organisation, I was able to step into the role of MEAL Manager. This promotion has been a significant moment in my career, and it reflects the organisation's dedication to supporting the growth of its team members, as well as the nationalisation of management positions. TGH's focus on capacity-building and developing local talent has given me the opportunity to build my skills and take on more leadership responsibilities. I'm grateful for the opportunities I've had and look forward to continuing to contribute to TGH's mission, particularly as we work on strengthening our monitoring systems and expanding partnerships in 2025. »

Saki Singh Adhikari

Project Manager in Nepal

« I began my professional journey with TGH in 2019 as a Reporting Officer, then progressing to the role of Assistant Project Coordinator, and ultimately advancing to the position of Project Manager in 2022. Over the past six years, this trajectory has been instrumental in shaping my professional development, enhancing my knowledge, and enriching my overall ex-

perience. My work across a diverse range of activities, including WASH, livelihood initiatives, Disaster Risk Reduction (DRR), and climate change, has enabled me to strengthen my technical expertise and assume greater leadership responsibilities. I express my sincere gratitude for the trust and opportunities that TGH has afforded me throughout my career. The organisation's commitment to nurturing and empowering its team members has been an important aspect of my growth. I take pride in contributing to TGH's mission and remain dedicated to working hard towards shared goals, with the aim of making a meaningful impact in the communities we work for in Nepal. »

Zana Smail

Country Director in Iraq

« Since January 28, 2018, when I first joined TGH as Deputy Project Manager, I have been inspired by TGH's values, working environment, and culture of excellence, inclusivity, and collaboration. Over the years, I have been honored to earn the respect and recognition of my fellow TGH colleagues. I have been fortunate to experience significant professional growth within the organisation, progressively taking on greater responsibilities. Becoming the Country Director in 2024 was a significant moment in my career. It was a recognition of the trust that TGH has placed in me, and it deepened my sense of ownership and responsibility towards our mission. I am honored to lead the mission that has been driven by collective action, collaboration, and a commitment to upholding our shared aspirations and reputation. This role has led me to be engaged more in organisational strategy and leadership. This would not have been possible without the unwavering support from colleagues at HQ and the mission. I am excited to continue this journey with TGH with the same motivation and aspirations. »

THE ASSOCIATION'S BOARD OF DIRECTORS

The members of the Board of Directors are elected at the Annual General Meeting for a renewable 3-year term. The members of the Board carry out their role on a volunteer basis. The Board meets at least once a quarter. The Executive Committee meets every month with the TGH management team.
